

Installing the MCG Mobile Medical App Suite

1. If you have not already done so, install iTunes.
<http://www.apple.com/itunes/download/>
2. Once you have iTunes installed, go to MyMCG (<http://my.mcg.edu/>)
3. Log in to MyMCG using your MCG net ID and password

Login Using Your MCG netID

Enter your user name and password to login.

User Name

Password

4. Click on the Information Technology tab

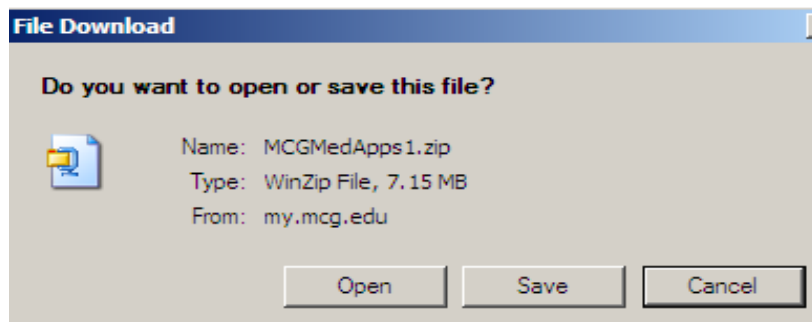

5. Scroll Down to Software Downloads

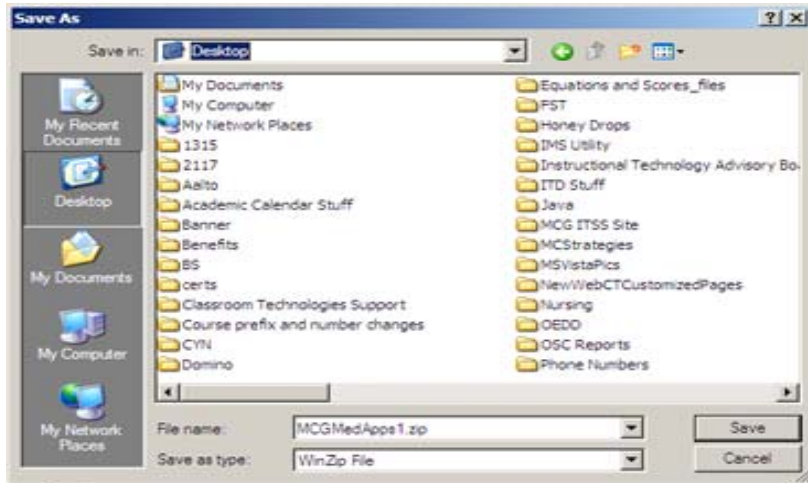

6. Click on the MCG Mobile link

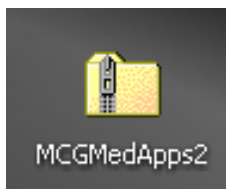

7. Choose "Save"

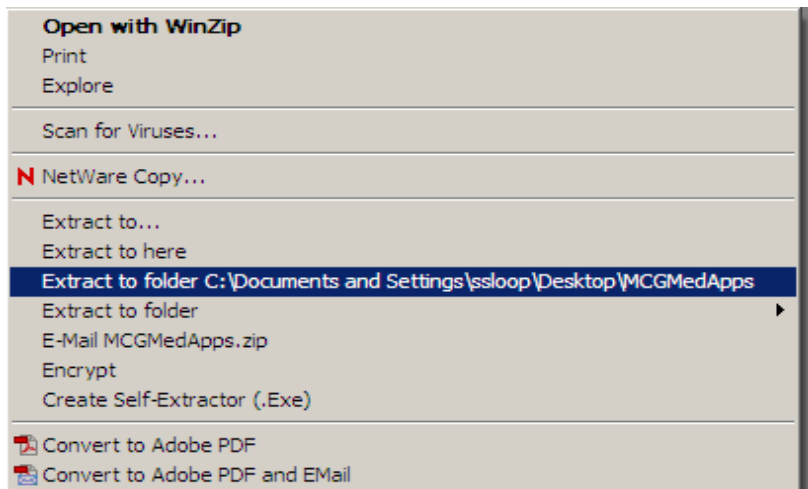

8. Navigate to a location to save.

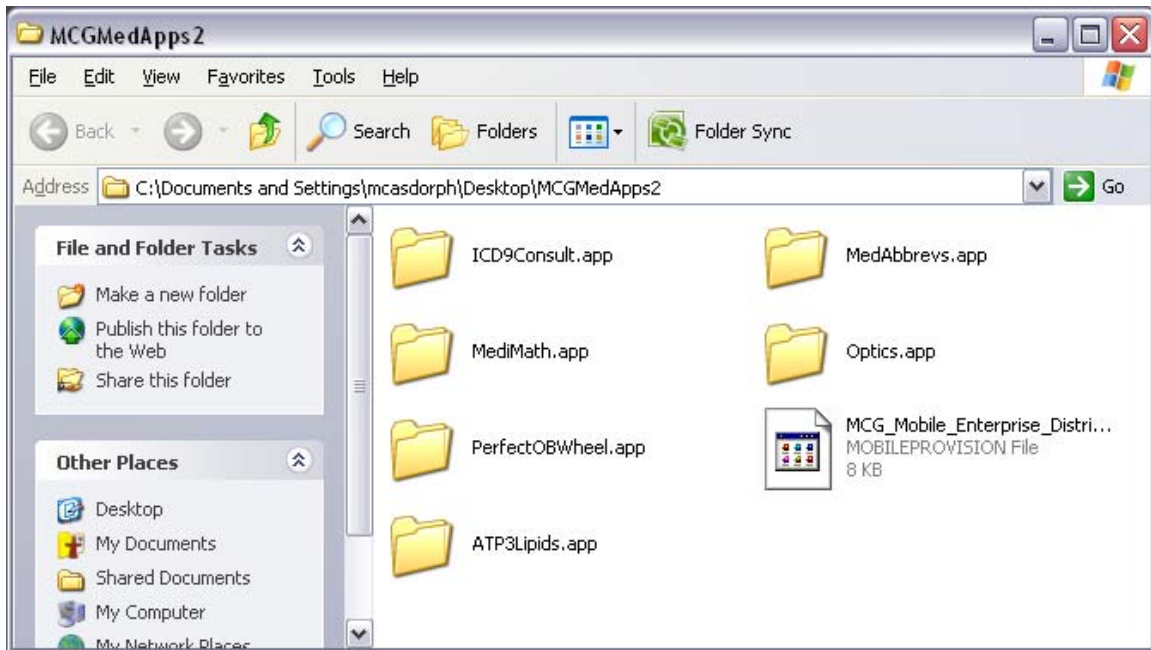

9. Right click the MCGMedApps2 zipped file.

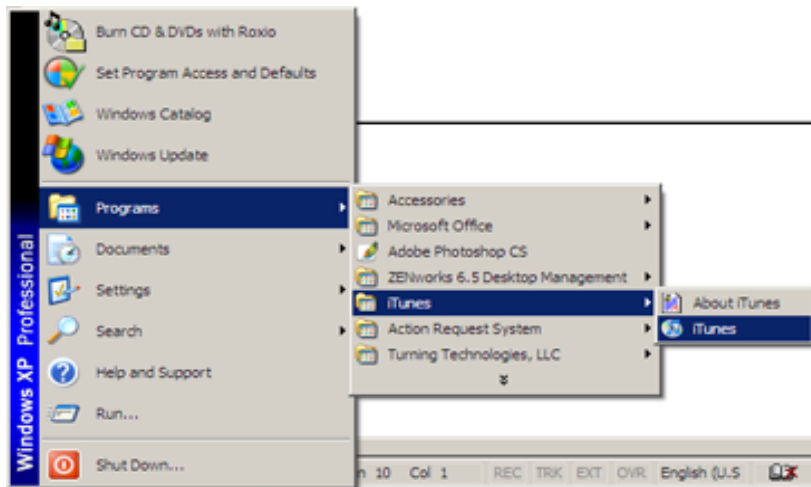

10. Extract to folder

11. Confirm you have a folder created from the extract of the zip file and open the folder to view the contents.

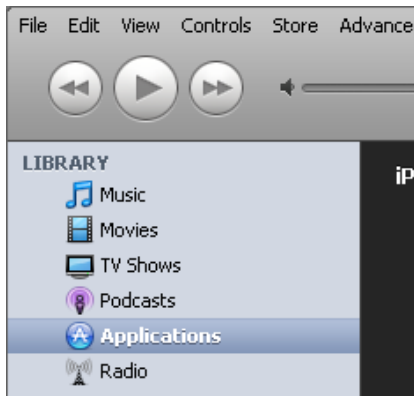

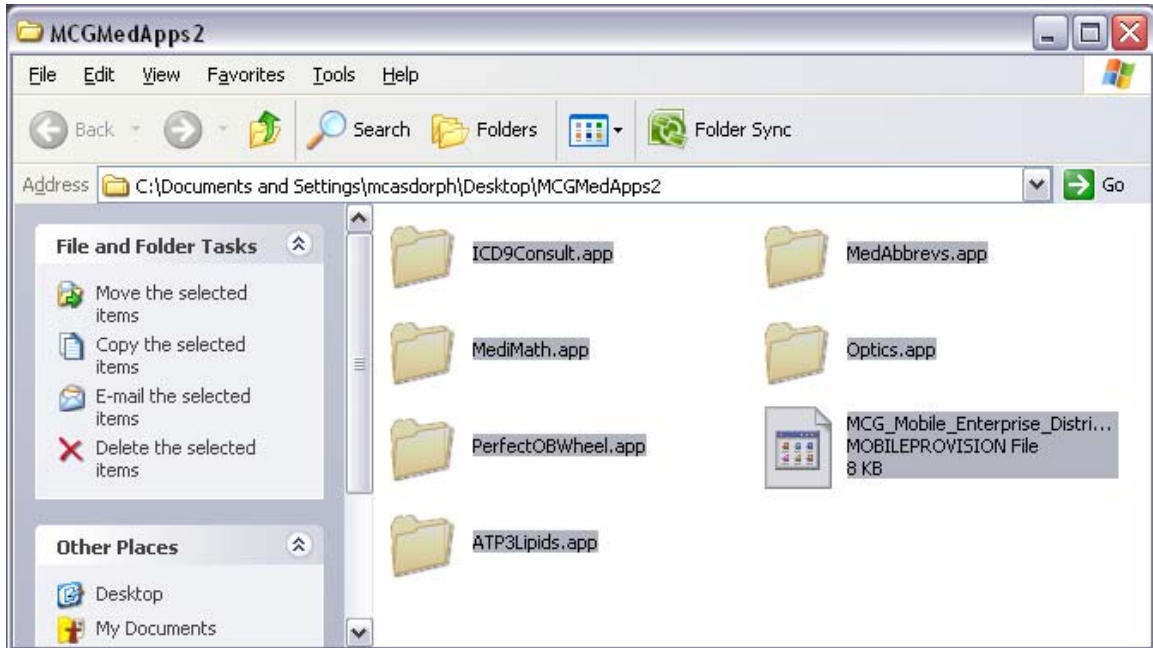

12. Open iTunes

13. Select ALL of the contents of the MCGMedApps folder and drag and drop them into the iTunes library.

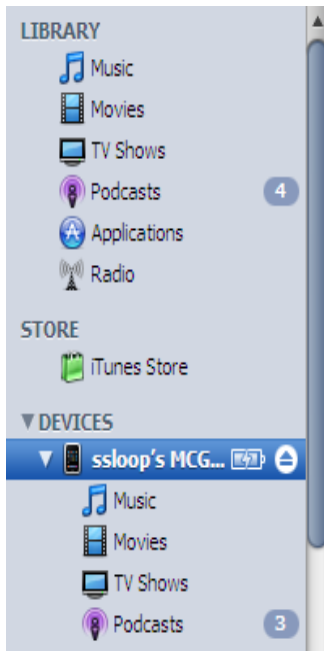

UPDATES: If you have installed a previous version of the applications, you will be prompted to replace the old versions. Click replace each time that it prompts you (once for each application).

14. Click on Applications within the Library and view your medical apps. You are now ready to synch with your iTouch or iPhone.

15. Connect your device to the computer with your library via the USB cable supplied so that it appears in the list under Devices.

16. Click on the Applications tab in the right window to view your recently added applications and check off those you want to add.

17. Drag and drop each application onto your device.

18. Click Apply

19. Test your apps on your iPhone or iPod Touch.

NOTE: If you had a previous version of the MCG Medical Application Suite on your device you may need to delete the expired MCG Enterprise Distribution Profile. The profile is located on your iPhone or iPod Touch under Settings>General>Profiles.
