

Important Conference Information!

It's not too late to join other peer supporters from across the country at the 3rd annual National Peer Specialist Conference!

We have an impressive lineup of workshops and keynote speakers, including Larry Fricks, Mary Blake and Lori Ashcraft. Workshop topics will include forensic peer specialists who work in correctional facilities, handling workplace conflicts, and new skills you can use in your practice.

A special presentation will feature the education program at the Medical College of Georgia where peers teach doctors in training about recovery!

Lori Ashcraft

This will be an event to remember. Participants will learn new skills and network with others from across the country so they can learn about other peer support programs.

Larry Fricks

More information about the conference can be found at the
